2. Step by step instruction sheet:

Open Photoshop
Create new documents to landscape 8x10 or 10x8 inches depending on how the canvas looks.

- Use image from the internet (open in its own document)
- Add layer
- Delete locked background layer
- Add Layery: command + J
- Make sure the bottom added layer is the grey and white checker box.
- Make selections.

- Drag and drop selected image (one at a time onto the photoshop icon).
  - Make sure The document with images to be selected is a separate document.

- Open the image file.
- Make sure a second layer (make sure the second layer has the checkerboard background (ideal for selecting).
- Once selected drag and drop image to the 'new document that is 10x8'
- Have each image as a separate layers, repeat as often as you like.
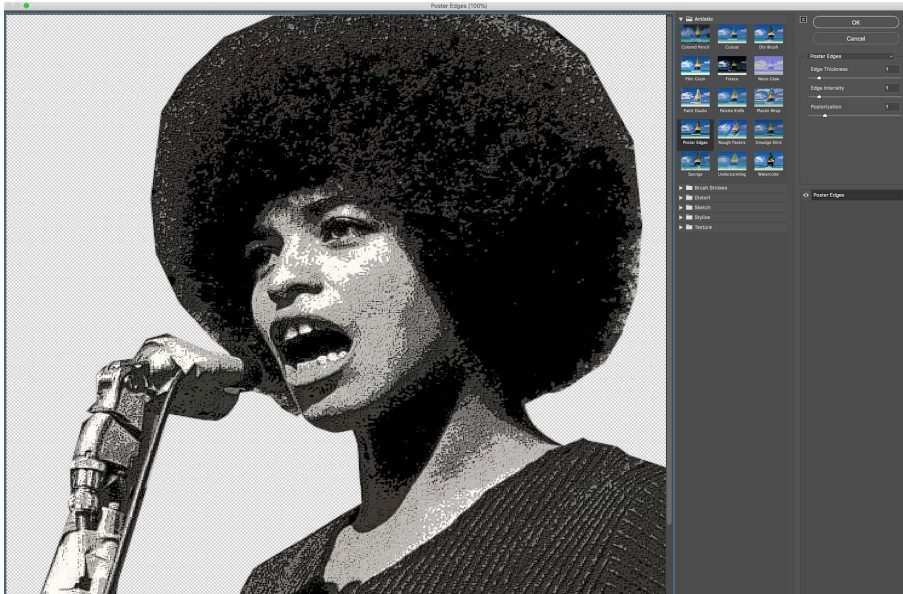

- Drag and drop selected image into the new canvas page
- Select 2 colors like yellow and black to use as a base
  - At the top of the bar, click on Filter Gallery, scroll down to 'Stamp'
  - Make sure your darks are dark and lights are light - balance at left bar.
 - Select to the left, feel free to smooth out shadows

- Once image is 'Stamped'
  - Smooth out particles bu=y using the brush tool, sample the desired tone and add or subtract the color
  - For a more powerful image focus on high contrasting shapes, and smooth.
  -
- Add blank layer (underneath the stamped image)

  - Divide half the background by using the rectangular marquee tool
  - On one side (left) select a color aka purple
  - On other side - Divide half the background by using the rectangular marquee tool (Add Pink)
  - Pull a patterned image from the internet, drag and drop pattern to pink side.
    - Pull the tab under the layers manual 'Screen' play with the different effects.

- ■ Can add custom shape tool and add the Female Symbol Sign to her bottom left chest area.
- ■

- ● Quick tips:
- Selection tool: Command + L
- Unselect: Command + D
- For images that are hard to select - try selecting the background first the reasing the background. Helpful in grey areas, similar to the main image.

-

-

-

-   See the marching ants example to the left.

Continue to add layers, focus on the action in the foreground weather it be a portrait or a ralley, Can add text. Above the main subject or to the side. Explain a few examples we (Teachers Made).

Lastly Save your image as high res 300px. Can also create a JPG or PNG file for quicker save and print time.
